

Building a RAG Chat Assistant for DSV

NLP Group Project Presentation - 3rd June 2025

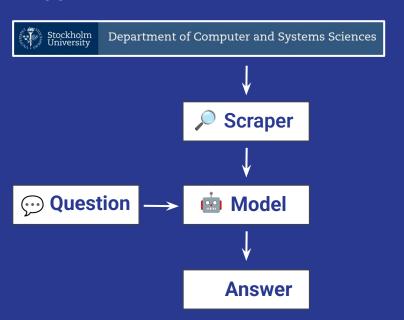

Ippokratis Pantelidis Fabian Sperber Ramon Ventura Navarro Lorenzo Vercilli

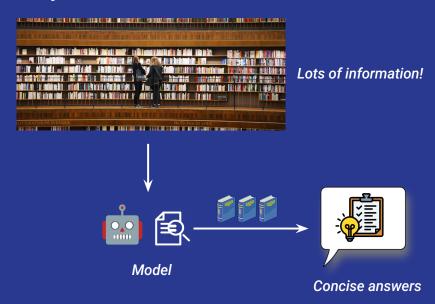

A Smarter Way to Ask Questions About DSV

What

Why

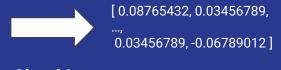

- URL Scraping to gather information from the department websites (186 URLs explored)
- Extracted the text content from each URL and saved it in JSON format
- Used a pre-trained Sentence Transformer to generate the word embeddings (paraphrase-mpnet-base-v2 from the Hugging Face's Sentence Transformers library)
- The embeddings are then used to build the Retriever

{"url":"https://www.su.se/english/sea rch-courses-and-programmes/ml273 n-1.581408", "content": "The course introduces

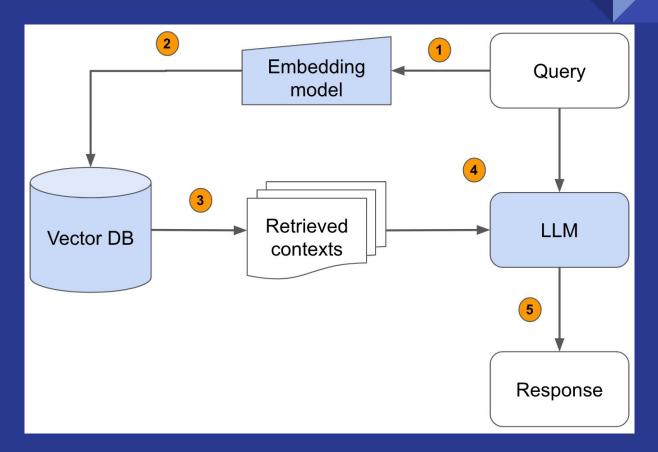

"content": "The course introduces Natural Language Processing, NLP...}

Chunking + Embedding

Model Architecture

Model Evaluation

Method

- Extrinsic: Manual sample queries used (top-down evaluation)
- Relevance and accuracy of responses assessed
- Focus on response comprehensibility and accuracy

Insight

- Works well with clearly formulated and specific questions
- Weaknesses with vague queries (too many hits)
- No hallucinating, but answers can get creative

Question 💬

How can I contact the DSV International Office?

Response

Response: You can contact the DSV International Office by sending an email to exchange@dsv.su.se (for partner universities), exchange-in@dsv.su.se (for incoming students), or exchange-out@dsv.su.se (for outgoing students). If you have questions about buddies,
